

XCLINIC

is the innovative **DIGITAL** partner of your profession.

With XClinic's inertial sensor technology, parallel bars, wall bars, tables and mirrors are transformed into accurate measuring instruments that allow for the objective evaluation of movements, enabling the verification and comparison of results from entire exercise and therapy sessions.

XClinic allows you to motivate your patients, fostering greater adherence to therapy.

FERROX®

XCLINIC

The **DIGITAL** evolution of your rehabilitation gym.

Over 100 exercises for your patients

XCLINIC enhances the quality and effectiveness of rehabilitation sessions.

XClinic's versatility of use and more than 100 preloaded exercises enables you to design highly personalised therapy regimes for orthopaedic, neurological and sports patients.

XClinic is a medical device that allows you to objectively assess your patient's progress.

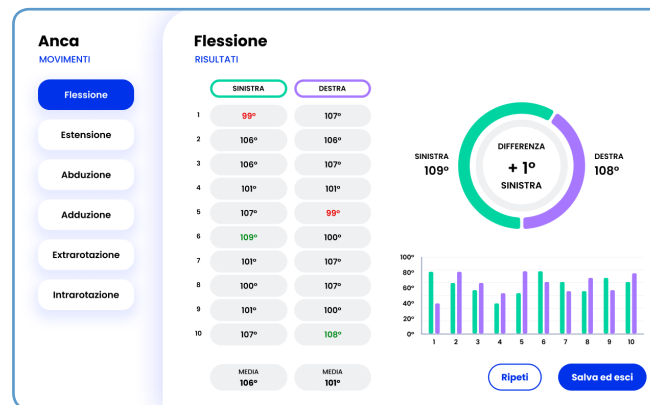

it is an exclusive product of

- SET OF OBJECTIVE ASSESSMENTS**
 XClinic utilises the most accurate wearable motion sensors available on the market to perform **clinically validated assessments** and continuously monitor your patient's progress in terms of balance, mobility and strength.
- BIOFEEDBACK**
 XCLINIC enhances the rehabilitation experience through the biofeedback principle of real-time movement, **which directly impacts neuroplasticity and strengthens motor patterns** at the subcortical level.
- OBJECTIVE ASSESSMENT of the therapeutic journey**
 By recording each individual session, you can effectively **track your patient's progress**, comparing the improvements made throughout their rehabilitation journey.
- AUTOMATICALLY PROCESSED RESULTS**
 Synthetic indices of significant clinical relevance are made available in the form of convenient **PDF reports that can be sent by email**, saving you considerable time.
- PATIENT MOTIVATION**
 The application of the biofeedback technique, as well as readily accessible reports of **significant clinical relevance**, keep patients motivated and actively engaged in their therapeutic journey.

XCLINIC

THE BIOFEEDBACK TECHNIQUE ENSURES THE OBJECTIVE ASSESSMENT OF THE TREATMENT AND IMPROVES THE PATIENT EXPERIENCE.

XCLINIC

Increase the value of your work and optimise your time.

XCLINIC OFFERS **EFFICIENCY and autonomy** by enabling simultaneous monitoring of multiple users. Your patients can work on their own, aided by visual-auditory biofeedback and a clear and intuitive interface.

By incorporating XCLINIC into your practice, you can **DIFFERENTIATE YOURSELF FROM COMPETITORS** by delivering superior quality therapy programs. This will inspire patients to be even more motivated to complete their entire course of treatment.

Its portability is indispensable for increasing the number of patients treated at the same time.
